

Ashutosh Mitra

Aspiring Software Developer

Phone: +91 7735210459 | Email: ashutoshmitra110@gmail.com

LinkedIn: <https://www.linkedin.com/in/ashutoshmitraji> | GitHub: <https://github.com/AshutoshMitraJi>

Professional Summary

Software Developer with strong foundations in Data Structures, Algorithms, and Object-Oriented Design. Experienced in building scalable backend systems using Java and Spring Boot, with hands-on experience in REST APIs and database design. Proven ability to lead projects and deliver end-to-end solutions. Seeking to contribute to impactful and scalable software systems.

Experience

Student Intern – Java Full Stack | Java Technocrat, Bhubaneswar | May 2024 – Present

- Designed and delivered enterprise-grade full-stack applications using Java, Spring Boot, Angular, and REST APIs.
- Completed 2000+ hours of intensive training in Core & Advanced Java (JDBC, Multithreading, Layered Architecture).
- Built a Student Management CRUD System handling 100+ records with SQL + JDBC, ensuring data integrity and scalability.

Artificial Intelligence Intern | FutureX Skills | December 2024 – Present

- Developed AI-based applications using NLP techniques
- Built and tested models for real-world use cases
- Collaborated in designing scalable AI solutions

AI & Cybersecurity Intern | Edunet Foundation | Jan 2025 – Feb 2025

- Developed an AI-powered Healthcare Chatbot using Hugging Face, NLTK, and Streamlit for real-time symptom analysis.
- Implemented a Java-based Steganography System encrypting 1000+ character payloads using LSB techniques.
- Applied industry best practices in AI, ML, NLP, and Cybersecurity with end-to-end project delivery.

Projects

SmartQ – Smart Queue & Crowd Management System

- Designed and developed a full-stack multi-queue management system enabling users to join multiple queues, track real-time position, and monitor token status dynamically.
- Implemented secure REST APIs with Spring Boot and JWT-based authentication, supporting role-based access for users and admins.
- Engineered a scalable backend architecture using DTO pattern, eliminating circular dependencies and ensuring clean data transfer between layers.
- Built a responsive React dashboard with dynamic queue selection, real-time position fetching, and efficient state management using Axios.
- Developed admin functionalities including queue creation, deletion, serve-next logic, and waiting list monitoring.
- Optimized system design from single-queue to multi-queue architecture, making it production-ready and extensible.
- Tech Stack: Java, Spring Boot, Spring Security (JWT), ReactJS, MySQL, REST APIs

Tasty Town – Food Delivery Backend System

- Designed and developed RESTful APIs using Spring Boot to handle user orders, authentication, and menu services.
- Implemented layered architecture improving code modularity and maintainability.
- Optimized database queries reducing response time by ~20%.
- Built scalable backend capable of handling concurrent requests.
- Tech Stack: Java, Spring Boot, MySQL, PostgreSQL, Maven.

AI-Enabled Healthcare Chatbot

- Designed NLP pipeline using Hugging Face for intent recognition.
- Handled real-time query processing with Streamlit interface.
- Improved response accuracy using preprocessing techniques.

Technical Skills

- Languages: Java, Python
- Core CS: Data Structures, Algorithms, OOP, DBMS, OS
- Frameworks: Spring Boot, React
- Databases: MySQL, PostgreSQL
- Tools: Git, Postman

Education

B.Sc. in Information Technology & Management | 2023 – 2026

Udayanath Autonomous College of Science & Technology | CGPA: 8.7

Higher Secondary – 12th, CBSE | 2022-2023

Krishnamurty World School | 78%

Secondary – 10th, CBSE | 2020-2021

Krishnamurty World School | 91%

Certifications

- AWS APAC – Job Simulation
- Deloitte Australia – Job Simulation
- TCS iON Career Edge
- Machine Learning with Kaggle
- AICTE – AI for Students (Microsoft & SAP)

Additional

- Leadership: Team Lead, Technical Mentoring, Project Planning, Collaboration
- Languages: English, Hindi, Bengali, Odia
